

PRODUCT CATALOGUE • 2026

Bringing nature to market.

Responsibly sourced botanical ingredients —
essential oils, oleoresins, CO₂ extracts, floral absolutes
and natural isolates — for the world's most trusted brands.

What we make. Where it comes from.

Plantique Naturals is a B2B manufacturer and exporter of botanical ingredients from India. We work directly with farm partners across Kerala, Karnataka, Tamil Nadu, Madhya Pradesh, Uttar Pradesh and Odisha to source aromatic crops, floral harvests and spice rhizomes at the correct season and maturity — then convert them into essential oils, oleoresins, supercritical CO₂ extracts, floral absolutes and high-purity natural isolates.

Every batch is analytically characterised by GC-MS and shipped with a Certificate of Analysis. Manufacturing is licensed under FSSAI (Food Safety and Standards Authority of India), Licence No. **13626034000589**.

THIS CATALOGUE COVERS

Essential Oils	Steam-distilled aromatic oils, prized for purity and fidelity of scent.
Oleoresins	Concentrated flavour and colour, standardised for food and flavour applications.
CO ₂ Extracts	Solvent-free supercritical extracts with true-to-plant character.
Floral Extracts	Delicate absolutes and concretes for fine fragrance and personal care.
Natural Isolates	High-purity single molecules isolated from botanical feedstocks.

Essential Oils

Steam-distilled aromatic oils, prized for purity and fidelity of scent.

Lemongrass Oil

Cymbopogon flexuosus

METHOD	Steam Distilled
KEY CONSTITUENT	Citral (Geranial + Neral)
ASSAY	70% min
ORIGIN	Kerala, India

Bright, citrus-forward oil with a fresh, grassy aroma. Distilled at low pressure to preserve the delicate aldehyde profile.

Applications: Soaps & Detergents • Aromatherapy • Home Fragrance • Insect Repellents • Flavour Compounds

Cardamom Oil

Elettaria cardamomum

METHOD	Steam Distilled
KEY CONSTITUENT	α -Terpinyl Acetate
ASSAY	38% min
ORIGIN	Kerala & Karnataka, India

Warm, spicy-sweet oil from green cardamom pods. A workhorse ingredient in fine fragrance, oral care, savoury flavour and premium bakery.

Applications: Fine Fragrance • Bakery & Confectionery • Oral Care • Savoury Flavour • Aromatherapy

Ginger Oil

Zingiber officinale

METHOD	Steam Distilled
KEY CONSTITUENT	Zingiberene
ASSAY	25% min
ORIGIN	Kerala, India

Warm, fresh and woody with the characteristic zingiberene backbone. Widely used in flavour houses, functional beverages and warming massage blends.

Applications: Beverage Flavour • Aromatherapy • Massage Blends • Nutraceuticals

Clove Oil

Syzygium aromaticum

METHOD	Steam Distilled
KEY CONSTITUENT	Eugenol
ASSAY	80% min
ORIGIN	Kanyakumari, Tamil Nadu, India

Rich, warm-spicy oil with signature phenolic depth. Extensively used in dentistry, mouthwash, spicy accords and traditional formulations.

Applications: Oral Care • Pharmaceuticals • Fragrance • Flavour

Black Pepper Oil

Piper nigrum

METHOD	Steam Distilled
KEY CONSTITUENT	β -Caryophyllene
ASSAY	22% min
ORIGIN	Kerala, India

Dry, woody-spicy oil with peppery bite. Brings peppery lift and warmth to fine fragrance, savoury flavour and warming muscle formulations.

Applications: Fine Fragrance • Savoury Flavour • Massage Blends

Peppermint Oil

Mentha piperita

METHOD	Steam Distilled
KEY CONSTITUENT	Menthol
ASSAY	40% min
ORIGIN	Uttar Pradesh, India

Cool, minty oil with clean, energising freshness. Used across confectionery, oral care, personal care and pharmaceutical applications.

Applications: Oral Care • Confectionery • Pharmaceuticals • Personal Care

Cypriol Oil

Cyperus scariosus

METHOD	Steam Distilled
KEY CONSTITUENT	Cyperene
ASSAY	20% min
ORIGIN	Madhya Pradesh, India

Also known as Nagarmotha. Deep, earthy and slightly leathery — a treasured base note in oud accords, chypre compositions and modern niche perfumery.

Applications: Fine Fragrance • Oud Accords • Attars • Chypre Compositions

Oleoresins

Concentrated flavour and colour, standardised for food and flavour applications.

Lemongrass Oleoresin

Cymbopogon flexuosus

METHOD	Solvent Extraction
KEY CONSTITUENT	Citral
ASSAY	20% min
ORIGIN	India

Concentrated solvent extract of lemongrass leaves. Delivers full-spectrum lemongrass character in dosage-controlled form for beverage and functional food.

Applications: Beverages • Functional Foods • Nutraceuticals

Cardamom Oleoresin

Elettaria cardamomum

METHOD	Solvent Extraction
KEY CONSTITUENT	Volatile Oil
ASSAY	60% min
ORIGIN	India

Full-spectrum cardamom combining volatile aromatics with non-volatile flavour compounds for rounded, long-lasting character.

Applications: Bakery • Savoury Seasonings • Premium Chai • Confectionery

Ginger Oleoresin

Zingiber officinale

METHOD	Solvent Extraction
KEY CONSTITUENT	Gingerols
ASSAY	25% min
ORIGIN	India

Pungent, warm oleoresin with balanced gingerol content. Widely used in beverages, sauces and nutraceuticals.

Applications: Beverages • Sauces • Nutraceuticals • Bakery

Clove Oleoresin

Syzygium aromaticum

METHOD	Solvent Extraction
KEY CONSTITUENT	Eugenol
ASSAY	60% min
ORIGIN	India

Deep, rounded clove profile for meat seasonings, sauces and traditional formulations.

Applications: Meat Seasonings • Sauces • Pharmaceuticals

Black Pepper Oleoresin

Piper nigrum

METHOD	Solvent Extraction
KEY CONSTITUENT	Piperine
ASSAY	40% min
ORIGIN	India

Pungent, aromatic pepper concentrate combining pungency and aroma in a dosage-controlled format.

Applications: Seasonings • Meat Products • Snack Coatings • Nutraceuticals

CO₂ Extracts

Solvent-free supercritical extracts with true-to-plant character.

Lemongrass CO₂

Cymbopogon flexuosus

METHOD	Supercritical CO ₂
KEY CONSTITUENT	Citral
ASSAY	65% min
ORIGIN	India

True-to-plant lemongrass with vivid top notes preserved from the fresh leaf.

Applications: Fine Fragrance • Premium Aromatherapy • Natural Personal Care

Cardamom CO₂

Elettaria cardamomum

METHOD	Supercritical CO ₂
KEY CONSTITUENT	1,8-Cineole
ASSAY	30% min
ORIGIN	India

Solvent-free supercritical extract of green cardamom — rounded, natural aroma profile for premium flavour houses.

Applications: Premium Flavour • Clean Label • Fine Fragrance

Ginger CO₂

Zingiber officinale

METHOD	Supercritical CO ₂
KEY CONSTITUENT	Zingiberene
ASSAY	28% min
ORIGIN	India

Rich, fresh ginger character retaining both volatile aromatics and non-volatile gingerols.

Applications: Premium Beverage • Nutraceuticals • Clean Label Flavour

Clove CO₂

Syzygium aromaticum

METHOD	Supercritical CO ₂
KEY CONSTITUENT	Eugenol
ASSAY	82% min
ORIGIN	India

Concentrated, solvent-free CO₂ extract of clove buds — clean, pungent and highly potent.

Applications: Oral Care • Premium Fragrance • Nutraceuticals

Black Pepper CO₂

Piper nigrum

METHOD	Supercritical CO ₂
KEY CONSTITUENT	β-Caryophyllene
ASSAY	25% min
ORIGIN	India

Preserves both volatile aromatics and piperine bite. Used in premium flavour and warming personal-care applications.

Applications: Premium Flavour • Warming Personal Care • Fine Fragrance

Bakuchiol

Psoralea corylifolia

METHOD	Supercritical CO ₂ / Purification
KEY CONSTITUENT	Bakuchiol
ASSAY	99% min
ORIGIN	Odisha, India

A naturally occurring meroterpene phenol from babchi seeds — a gentle, plant-derived alternative to retinol. Standardised to ≥ 99% by HPLC.

Applications: Anti-ageing Skincare • Retinol Alternative • Sensitive-Skin Formulations • Clean Beauty • Serums & Night Creams

Floral Extracts

Delicate absolutes and concretes for fine fragrance and personal care.

Jasmine Sambac Absolute

Jasminum sambac

METHOD	Solvent Extraction
KEY CONSTITUENT	Benzyl Acetate
ASSAY	20% min
ORIGIN	Tamil Nadu, India

Rich, indolic and deeply narcotic — a treasured heart note in oriental, floral and modern white-floral fragrance.

Applications: Fine Fragrance • Attars • Niche Perfumery

Tuberose Absolute

Polianthes tuberosa

METHOD	Solvent Extraction
KEY CONSTITUENT	Methyl Benzoate
ASSAY	18% min
ORIGIN	Tamil Nadu, India

Creamy, buttery and narcotic — one of the most sought-after white-floral notes in fine fragrance.

Applications: Fine Fragrance • Niche Perfumery

Jasmine Grandiflora Absolute

Jasminum grandiflorum

METHOD	Solvent Extraction
KEY CONSTITUENT	Benzyl Acetate
ASSAY	22% min
ORIGIN	Tamil Nadu, India

The classical French-style jasmine absolute — radiant, warm and unmistakably jasmine.

Applications: Fine Fragrance • Luxury Perfumery • Attars

Natural Isolates

High-purity single molecules isolated from botanical feedstocks.

Citral 95% (ex Lemongrass Oil)

Cymbopogon flexuosus

METHOD	Fractional Distillation ex Lemongrass Oil
KEY CONSTITUENT	Citral (Geranial + Neral)
ASSAY	95% min
ORIGIN	Kerala, India

High-purity natural citral standardised to 95% min.
A powerful, fresh lemony top note and starting material for downstream aroma chemicals.

Applications: Flavour Compounds • Fine Fragrance •
Aroma Chemical Feedstock • Vitamin A Synthesis •
Home & Personal Care
